SERVICE DECLARATION

The C E S organization is well acquainted with the infrastructure of Germany and Europe and makes use of all available sources. No matter whether it be by road, rail or in the air, C E S organizes the most superior service for his customers. Germany will become even more important as cross trade area for entire Europe. You and your customer demand goods and information, available on time.

That is the point of all our planning and concepts for C E S European distribution system. There is no “ready-made” distribution. Based on individual requirements and size of order your shipments are transported by truck, multi-modal systems or air. C E S well knows the regulations in the individual countries. With our knowledge, agents and network of facilities C E S offers a wide range of services. To create a certain efficiency is one matter. To organize outstanding performance for better service is what presents the difference – all over Europe- with an exactly balanced price structure.

LOGISTICS

Almost each company be it manufacturer, importer or retailer have their own embracing marketing concept based on specific ideas and commitments. Therefore every logistic outlet must as a result be tailor-made to ensure one of the most essential assignment is fulfilled, namely that: the goods are in the right place at the right time in accordance with the size of the order.

In order to meet the requirements of the market a coordination between the customer marketing and associated logistic of the service rendering company is necessary. C E S Logistic Service provides the right answer with logistic concept for procurement and distribution.
